

Life Compass

A Program of the Ohio Masonic Home

There is no better place to celebrate your birthday than at home. Every day, in the United States, 10,000 people celebrate their 65th birthday. In 2010 the population of Americans, over the age of 65, was 29 million people. By the year 2030 that number will grow to over 70 million people.

Due in large part to our advanced healthcare systems, Americans are living longer and more productive lives. With this transformation, people will be looking for ways to age where they want and how they want. In most situations this means living life in the comfort and familiarity of your own home – with a little help as needed.

In response to this the Ohio Masonic Home introduced the Life Compass program. Life Compass is a compilation of products and services that benefit those requiring in-home or retirement community living assistance and support.

Life Compass provides a broad range of leading edge, assistive, technology-based products to allow people to age where they want and how they want. Products include:

- Medical alert pendant that allows you to summon assistance you need as a result of a fall
- Medication adherence packaging for your prescription drugs
- In-home safety monitoring systems to detect falls and enhance cooking safety
- Web-enabled in-home blood pressure, sugar and weight monitoring systems that provide direct communication to medical personnel
- Out-of-home emergency locator devices that help locate and recover those who tend to wander from their home

If you are interested in learning more about this leading edge assistive technology in addition to our professional and service based support check out our newest program Life Compass by calling toll-free 1-877-881-1623 or visiting our latest website www.agerespectfully.org and find out how we can help you celebrate life where ever you call home.
